

Tabs procedure

The following tabs procedure should be used going forward.

- Please have the courtesy of arriving at tabs in days by the latest ten minutes prior to the start of play, this being 13.50 during summer starting at 14.00 and 13.20 during winter to start at 13.30.
- The tab master will try his best to accommodate **ALL** players on the day but please be aware that should you arrive after the allocated time you **may** have to be the one to sit out if the need arises.
- Should you be putting your tab in for the day you may do so by notifying the tab master on duty by means of a what's app message. You would however still be required to be there before start of play.
- Two people will be on tab duty, one will see to the financial side by taking in the tab money and ensuring that the correct number of players vs money collected is correct and handed over to the bar person on duty to record via the Point-of-Sale till. Once completed the second person preferably a senior player will assist with the tab draw. His / her objective will be to ensure that the draw is done fairly by means of drawing the names out of the "bag". The tabs masters will then have the prerogative of changing some of the names to ensure that the teams be competitive.
- Nobody will be allowed to hover around the tab masters while the draw is being done. Once the draw has been completed the board will be made visible to all players.
- **Thus the importance of arriving at tabs in days 10minutes prior to the start of play is important and will give the tabs masters time to carry out their duty.**
